

TRANE[®]

CMAC Standard Efficiency

BALANCE[™]

You can be sure **Trane Balance™ multi-pipe units** with high performing scroll compressors will deliver what you need: **simultaneous cooling and heating**, precise temperature control, safe and sustainable system with low operating costs. Trane multi-pipe units deliver real value for you – and real comfort for your customer.

Innovative and versatile solution

- Simultaneous cooling and heating with one compact unit
- Trane Tracer™ UC800 controller with unique software designed for multi-pipe units
- Suits new construction and building renovation – from office buildings and hospitals to places of entertainment and hotels
- W-shape condenser coils to reduce unit footprint and optimize unit performance and efficiency
- High performing DSH scroll compressors, AC fans or energy saving EC fans

High efficiency and lowest cost of ownership

- Optimal use of renewable and recovered energy
- Full energy recovery for the best return on every kilowatt-hour of electricity
- Exceeds energy efficiency benchmarks based on Total Efficiency Ratio
- Quality and reliability to count on. Professional support by 24/7 Trane Service

Optimized comfort, simple and safe

- Designed for superior performance, serviceability and durability
- Safe water-based system with no refrigerant inside the building
- Industry leading acoustic comfort levels with optional low noise or super low noise version

Sustainability

The continuous drive to improve energy efficiency of building systems requires an optimal balancing in the demand and supply of both heating and cooling. Trane's multi-pipe units can simultaneously deliver heating and cooling. A sustainable solution for many applications.

Unit description

- Simultaneous cooling and heating with two completely independent water circuits, one for chilled water and one for hot water
- Precise leaving chilled/hot water temperature control
- 5 different operating modes available to optimize performance according specific customer application requirements
- High performing scroll compressors and low speed fans
- Intelligent Tracer™ UC800 controller with “state-of-the-art” software developed for multi-pipe units
- One to three refrigerant circuits with precise electronic expansion valves
- W-shape coils for improved air flow and easy access
- Patented self-adaptive defrosting system reducing number of defrost cycles by 50%
- Stainless steel (AISI 316) brazed plate evaporator and recovery heat exchanger, externally insulated , including a water pressure differential switch and anti-freeze protection electric heater
- Smart pump management for outdoor freeze protection

Factory-mounted options

- Different built-in hydraulic kits available with cooling and heating circuit pumps of 150/250/450 kPa
- Super low noise or low noise version
- SmartCom interface for full interoperability with BACnet™ Protocol MS/TP or TCP/IP, Modbus or LonTalk™
- Soft starter
- Automatic circuit breakers
- Power factor correction to cos phi 0.91
- Control panel electric heater with thermostat
- EC fans for external static pressure up to 100 Pa
- Condensing control with variable fan speed modulation

NEW!

Trane Tracer® UC800 and TD7 touch screen

Trane: designed to be the best - tested to prove it

Trane European HVAC Research and Development Testing Facilities fully comply with European EN 14511-2013 and EN 14825-2016 standards, meaning that procedures, measurements and conditions are respected to provide our customers with trustworthy and certified performances.

Experience performance validation of your unit – before shipment

Schedule an optional witness test in our testing facility in France before the unit ships to the jobsite. Trane’s test facility is capable of evaluating the performance of your Multi-pipe unit - based on customer-defined parameters. Contact your local sales office for more information.

CMAC unit on our Charmes (F) laboratory test loop

Trane European Large HVAC Test Facility

A 5000m³ climate chamber with advanced ambient air temperature and humidity control. Regardless of outdoor air conditions, a wide range of operating conditions can be simulated within this range:

- Air temperature temperature: -25°C/+55°C
- Leaving water temperature: -12°C/+65°C (Below 4°C with glycol)
- Humidity: 10 – 90% max @ 7°C dry bulb.

The Best Bundled in One. Perfect Balance of Performance and Economy

Discover Trane's full range of innovative multi-pipe units

With scroll compressors

- CMAC Standard Efficiency (SE)
- CMAC High Efficiency (HE)
- CMAC Extra High Efficiency (XE)
- CMAB High Seasonal Efficiency (HSE), Adaptive Frequency Drive, inverter technology

With screw compressors

- RTMA Standard Efficiency (SE)
- RTMA High Seasonal Efficiency (HSE) Adaptive Frequency Drive, inverter technology
